DETAILED ACTION

Reissue Applications

1. The reissue oath/declaration filed with this application is defective because it fails to contain a statement that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

3. The oath or declaration is defective because:

It does not state that the person making the oath or declaration has reviewed and understands the contents of the specification, including the claims, as amended by any amendment specifically referred to in the oath or declaration.

4. In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Claims 1-56 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251. See 37 CFR 1.175. The nature of the defect is set forth above.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."

Art Unit: 3727

5. Applicant's offer to surrender the original patent has been received. Applicant is reminded that the original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

6. Claims 1-56 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

Specification

7. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: an "annular section defining (or forming) an opening".

Claim Objections

8. Claim 43 is objected to because of the following informalities: -- a -- should be inserted before "cap' in line 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

9. Claims 43-56 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the groove can be formed on the annular section since the annular section forms an opening.

Claims 43 and 47 each recites the limitation "the first surface of the annular section" in line 6. There is insufficient antecedent basis for this limitation in the claims.

Art Unit: 3727

Claims 50 and 54 each recites the limitation "the first surface of the annular section" in line 10. There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 43,45 and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Luczak et al. (US 3,717,276).

Luczak teaches an insert **13** having an annular section forming an opening **18**, a first surface opposite a second surface and a groove **19** formed on the first surface and extending from the opening.

12. Claims 43,44, and 46 are rejected under 35 U.S.C. 102(b) as being anticipated by Mineno (JP 7-96960).

Mineno teaches an insert **13** having an annular section forming an opening **16A**, a first surface opposite a second surface and a groove **17** formed on the first surface and extending from the opening.

13. Claims 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Montgomery (US 5,785,196).

Disclosed is cap **22** with a top portion **24**, an annular extending wall **26**, and groove **44** formed on the inner surface of the top portion and extending chordwise from a first point adjacent the annular wall to a second point adjacent the annular wall. Wherein the points are adjacent the same portion of the wall and the claim does not specify how far the extension is, the claims are anticipated by Montgomery.

Conclusion

14. Applicant's attention is directed to 37CFR 1.173 as it pertains to amendments for reissue applications. The clean copy/marked-up copy practice is not applicable.

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Malay teaches a venting insert of interest.

16. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 305-3579. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

17. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:

I hereby certify that this correspondence for Application Serial No. _____ is being facsimiled to The U.S. Patent and Trademark Office via fax number (703) 305-3579 on the date shown below:

Typed or printed name of person signing this certificate

Signature _____

Date _____

18. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robin Hylton whose telephone number is (703) 308-1208. The examiner works a flexible schedule, but can normally be reached on Monday - Friday from 9:00 a.m. to 4:00 p.m. (Eastern time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lee Young, can be reached on (703) 308-2572.

Art Unit: 3727

If in receiving this Office Action it is apparent to applicant that certain documents are missing, e.g., copies of references cited, form PTO-1449, form PTO-892, etc., requests for copies of such papers should be directed to Errica Bembry at (703) 306-4005.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-1148.
